

NOTE: Files do not have a date, as we are not 100% sure when each step was taken

- 2LED_Toggle - Video of us testing a 2 LED toggle functionality
- 3LED_Test - Video of an earlier circuit, demonstrating the functionality required for this prototype
- BlueLED_Calcs - calculations regarding forward voltage and resistance required for the blue LED
- BlueLED_Testing - evidence of us properly testing the forward voltage of blue LED with the smallest resistance
- PrintA - First 3D print submission. This is a photo of the top only, which was much smaller than intended (failed print)
- PrintB - Second 3D print. Issue was that there was a slight printing mishap (not sure where)
